

## CHOP SHOP

They came for the party. They ended up spare parts. After a wild night at an underground rave, five friends head to a shadowy L.A. tow yard to retrieve their impounded car - and walk straight into a nightmare. What they find isn't a garage... it's a trap. A maze of wrecked vehicles, locked shipping containers, and one very calm man with a scalpel. Hart isn't just the owner - he's a disbarred surgeon running a human slaughterhouse operation where the victims are young, healthy, and still breathing. As the group is picked off one by one, Claire must face the brutal truth: the only way out is through blood, grit, and sheer will to survive. Tightly contained. Visually brutal. One location. No escape. *Chop Shop* is a raw, relentless horror-thriller that fuses grindhouse tension with modern social horrors - a story about what we're really worth when the system sees us as nothing more than parts.
